Trying to "git" a clue

Trying to "git" a clue

GIT

Download and install the lastest version of Git.

If you have never used git before, you need to do some setup first. Run the following commands so that git knows your name and email. The third line adds pretty command line colors.

```
git config --global user.name "Your Name"
git config --global user.email "your_email@whatever.com"
git config --global color.ui true
Check the current status of your repository:
git status
# On branch master
# Changes not staged for commit:
    (use "git add <file>..." to update what will be committed)
    (use "git checkout -- <file>..." to discard changes in working directory)
    modified:
                GIT_LAB1.html
    modified:
                GIT_LAB1.md
no changes added to commit (use "git add" and/or "git commit -a")
Next all files are added to the staging area and a snapshot is taken of the commit with the message "staging
all files".
git add .
git commit -m "staging all files"
[master fd942da] staging all files
2 files changed, 71 insertions(+), 25 deletions(-)
Check the status after the last commit.
git status
# On branch master
# Your branch is ahead of 'origin/master' by 1 commit.
nothing to commit (working directory clean)
```

```
Push changes to the remote repository.
git push
See if there is anything left to do.
git status
# On branch master
nothing to commit (working directory clean)
Show the last three commits with
git log -3
commit fd942da70649c0523132338065879f525d738c9b
Author: Alan Arnholt <arnholtat@appstate.edu>
        Thu Jan 9 13:58:20 2014 -0500

    staging all files
commit e240e45ba66f2d0d0d700e055bf24d7910764664
Author: Alan Arnholt <arnholtat@appstate.edu>
Date: Thu Jan 9 13:57:51 2014 -0500
    staging all files
commit 32949e2daf23c02ca724aef65b6dd7a4d0601f29
Author: Alan Arnholt <arnholtat@appstate.edu>
        Thu Jan 9 13:53:07 2014 -0500
    staging all files
Now, just to show how cool this is, we will mix in a little R.
library(ggplot2)
ggplot(data = CO2, aes(x = Type, y = uptake)) + geom_boxplot()
```
